

10'th AEPC Teaching course on paediatric arrythmias

June 19–20, 2026
Copernicus Science Centre
Warsaw, Poland

👉 **Save the date!** 👈

Welcome to the 10th AEPC Teaching Course on Paediatric Arrhythmias, organized by the AEPC Working Group on Dysrhythmia and Electrophysiology.

Understanding the mechanisms of cardiac arrhythmias in children and in patients with congenital heart disease is essential for the practice of paediatric cardiology. Both paediatric cardiologists providing in-hospital care and those working in primary care frequently encounter rhythm disturbances in their patients.

This two-day course is designed to enhance participants' knowledge and practical skills in the recognition and management of paediatric arrhythmias. The program will feature focused sessions on ECG interpretation, management of common arrhythmias, inherited arrhythmia syndromes, basics of electrophysiological (EP) studies, and paediatric pacing and device management. Emphasis will be placed on practical, case-based learning and real-world clinical application to support effective understanding and decision-making.

We are delighted to welcome you to Warsaw and wish you a stimulating and enjoyable educational experience.
